MENTAY 1200 CUSTOM

Plan ahead – include Mentay Turf Equipment in your budget. Enjoy success in turf wicket preparation!

Safety – Controls are easily accessible, there is a wide view for the operator, power steering. Braking occurs automatically when in neutral, hand brake is fitted.

Perfect weight ratio for wicket preparation, the **Mentay 1200** weighs 2260kg approximately water ballasted and with a tare weight of 1320kg, some even have rear roller concrete fitted.

The new "ride on" **Mentay 1200** has been designed specifically to meet the demands for a middle of the range roller, to assist you in the preparation and management of first class turf wickets.

In this competitive world, we have priced our unit to suit your budget, so include one in your budget today.

PRIMARY SHAFT - is a safety measure that prevents damage to the hydraulics

For good turf wickets

It is essential that a turf wicket be prepared so that it is durable enough to withstand the length of play. Generally the pitch should provide for consistent, regular "bounce". Such a pitch is normally truly level, grassed but finely mowed, hard, flat and well consolidated. The pitch should be well sealed and grass roots should bind it well. It may have a glistening, whitish appearance and possibly a green tinge.

The resultant bounce of a well-delivered cricket ball is greatly dependent on the hardness and density of the turf wickets playing surface. The best pitches in the world are created using Mentay Turf Care Equipment.

Extract – Sports Grounds and Turf Wickets by Karl Liffman

Specifications

- Motive Power Petrol Engine 4000 rpm std
- Ask about Diesel 4000 RPM
- Steering Wheel – Hydraulic
- In Line Filter – Prince
- Drive Chain 3/4 Simplex Sprockets
- Top Link Joints both ends
- Bearings are all off the shelf components
- Power Steering Cylinder 200mm Stroke x 50mm 1 inch
- Hydraulic Reservoir has 20 litres of Tellus 46 – Castrol (Hyspin 46)
- Front and Rear Removable Scraper Blades 900mm x 74mm x 10mm using galvanised steel
- Breather Fill for Hydraulic Oil
- Suction Oil Filter
- Transmission Sunstrand P – 15
- Hydraulic Motor – OMR160
- Braking (disc) Type

Shipping Dimensions

- 2800mm long x 1600mm wide x 2100mm high (approx).
- 1800mm without sunshade.

Lifting Points

4 Craneage Points are provided for unloading or lifting purposes.

Roller Weight

Perfect weight ratio for wicket preparation, the **Mentay 1200** weighs 2260kg approximately water ballasted and with a tare weight of 1320kg, some even have rear roller concrete filled.

Ballast

Barrel needs to be fully ballasted otherwise you will get a rocking and surging effect and a wave in your wicket table. If you use a diesel motor the tare weight will increase to 1420kg. Mentay says that this tare weight is the perfect weight.

Drum Dimensions

1200mm wide x 900mm diameter Front 1200mm x 600mm
We have 8mm Drums as well as 6mm Drums.

Plan ahead – Include MentayTurf Equipment in your budget! Enjoy success in your budget! Enjoy success in turf wicket preparation as so many other organisations have.

The latest roller in Mentay's stable is yet another example of our quality range of Turf Care innovations

The latest revolutionary ride-on roller has been developed specially by our Design division in order to meet demands for a middle of the range roller.

The **Mentay 1200** ride on unit will also prove to be a winner. The unit comprises a roller width of 1200mm and being a dual barrel roller, both barrels may be ballasted according to specific weight requirements. The tare weight is only 1320kg, but with water ballast the **Mentay 1200** can weigh anything up to 2260kg.

The **Mentay 1200** control of speed may be varied from between a very slow to a fast walking pace. The operator has a clear view thanks to a number of observation points which allow the operator greater vision when rolling wickets.

Other features include greater operator comfort and the option of using either a petrol or diesel motor.

- Easy to operate with smooth forward and reverse movements
- Variable in weight
- Variable speed – from very slow to a fast walking pace
- Extremely reliable and effective

In this competitive world we have priced our unit to suit your budget, so include one in your budget today!

As a policy of Mentay Steel Fab Constructions Pty Ltd in line with product movement, we may introduce modifications to the 1200 series roller from time to time and consequently the details given in this leaflet are subject to alteration without notice.
