

Senior and Intermediate models Soil Multi-Mixers and Soil Conveyors.

The Senior model Multi-Mixer has the largest capacity of the three mixers. All mixers are designed to streamline production of soil mixing and refining. Not only do the machines thoroughly mix they can also combine other additive elements to the soil and give you consistent equitable elements to every mixed batch. The senior model has the capacity of .8 cubic metres* of soil.

Illustrated the Intermediate Multi-Mixer with Soil Conveyor.

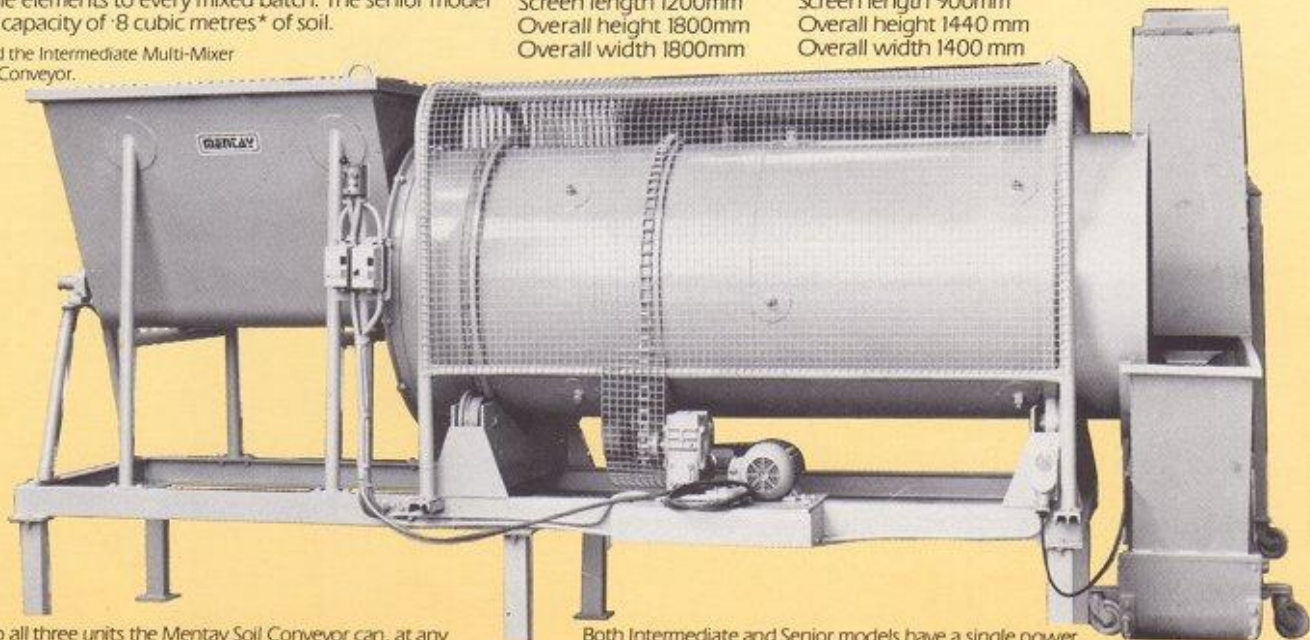

SENIOR MODEL DIMENSIONS.†

Overall length 5500mm
Barrel length 3000mm
Barrel dia. inside 1200mm
Screen length 1200mm
Overall height 1800mm
Overall width 1800mm

The Intermediate model Multi-Mixer appears cosmetically the same as the Senior Model and is the most popular of the three models with a .4 cubic metre capacity. Mixing time is 7-10 minutes, depending upon the type of soil being mixed. Both Senior and Intermediate Mixers feature the screw conveyor coupled to a large hopper and barrel. Forward and reverse barrel direction to all three Multi-Mixers ensures thorough mixing and screening.

INTERMEDIATE MODEL DIMENSIONS.†

Overall length 4600 mm
Barrel length 2300 mm
Barrel diameter, inside 900mm
Screen length 900mm
Overall height 1440 mm
Overall width 1400 mm

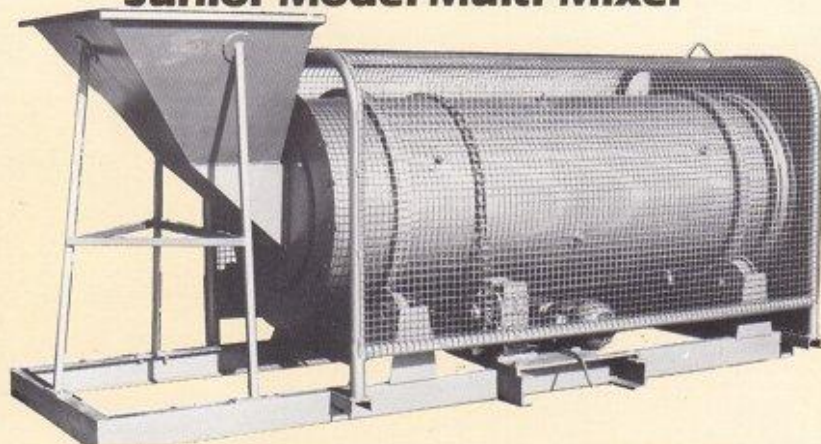

To all three units the Mentay Soil Conveyor can, at any stage, be added with conveyors to suit your requirements. All 3 Units available with sieve screens.

Both Intermediate and Senior models have a single power unit, a 2 H.P. drive motor with a 40:1 gear ratio.

Registered Design Number 78 723

Junior Model Multi-Mixer

The Junior model is designed as a gravity or manual hopper-to-barrel feed. Mixing time remains 7-10 minutes, depending upon the type of soil being mixed. The mixing capacity of this model is .2 cubic metres* and a single 1½ H.P. electric motor is used as the power source with a 40:1 gear ratio.
