## HAND ROLLER

### The Mentay Hand Roller

Used in preparation of cricket pitches.

The 'Mentay Hand Roller' comes with a sealed off water ballast compartment achieving total control of weight adjustment.

The 8mm single drum roller features bevelled edges on the barrel so that there will be no visible lines on the wicket once it has been rolled - a great feature of the 'Mentay Hand Roller'!

The 'Mentay Hand Roller' is used on cricket pitches, lawn green rolling and 'en tout cas' (dry material found on tennis courts). The 'Mentay Hand Roller' has been designed to get the job done! This is one piece of turf equipment that you can't afford not to have!

Bearing Setup

Ballast only for extra weight
