

MENTAY

Special **TOW-A-TARP**

A Mentay Tow a Tarp cover

Two models of these portable, drum mounted wicket table covers take the hard work out of protecting centre squares. With drums mounted on sealed roller bearings these provide easy, quick and reliable operation. Designed with occupational health and safety issues in mind the Mentay Tow a Tarp is the answer for turf protection, as necessary during interruptions to play or off season use.

Handling big covers is a problem with wind or perhaps a sudden down pour of rain can double the weight of the covers and also creates a frictional drag as it adheres to the playing surface.

Mentay designed a unique machine to cover these problems and by following the Mentay system you will find that lots of the problems you faced are covered.

The machine comes in a manual version, which needs extra assistants, but it still works and the principal is still the same.

TURF ROLLERS
For every application
